

## Turla celebrates 50 years of excellence

At the end of September the Italian technology partner of extrusion companies, Turla, celebrated its outstanding 50-year milestone. To share this anniversary, the company invited to Italy its customers, partners and friends from all over the world. Around 40 participants followed the invitation, including representatives

production Calvisius, ancient vinery and production of real balsamic vinegar, with a dinner accompanied by famous Italian opera music and a Gala dinner. "This event was a great occasion to stay together in a non-working relaxing atmosphere and enjoy the special moments that Turla have organized for their guests," the company said in a statement.

with a 28-MN, 8-inch press.

Faithful to its philosophy of evolution and high quality, Turla has constantly learnt from its customers, being very receptive and attentive to their requests and suggestions. That is why the company has proven to be reliable on a long-term basis, not only from the machinery point of view, but also in terms of service,

Celebrating an outstanding event – impressions from Turla's 50<sup>th</sup> anniversary

from companies such as Constellium in Germany, E-Max and Profel in Belgium, Extrugasa in Spain, Grupa Kety in Poland, Eastern Extrusion in Saudi Arabia, McKechnie in New Zealand, Grupo Navarra in Portugal, Purso Oy in Finland or Hydro in Italy.

The event was fully dedicated to Turla customers and no presses and machines were shown, no reference plants were visited. Turla organized an appealing two-day social programme – a visit of Ferrari, Black caviar

Most of the companies, such as Profalu, Purso, Hydro, Grupa Kety, E-Max, etc. have been working with Turla for 20 or even 40 years and still do so. The Hydro group, for example, has cooperated with Turla on 115+ projects and installations in 16 different countries over a time period of 20 years, and continues to do so. Another group, Grupa Kety, has been working with Turla for the last 19 years and after ordering a complete Turla extrusion line including an 18-MN press the Polish company has recently ordered a brand new, fully automated extrusion line

punctuality, tailor-made engineering ideas. Turla is one of few manufacturers capable of producing the complete extrusion line in-house, including the press. All this shows why Turla customers stay with Turla.

Only recently Altus (formerly Nalco) in New Zealand confirmed in a letter to Turla that their new 8-inch extrusion press and handling equipment, now in operation for over a year, is working to the full satisfaction of Altus.

The ALUMINIUM team which Turla all the best for the next 50 years. ■
